

GROUP_#7_CRC

Class	Responsibility	Collaborators
Employee	-Store Employee details	-Payclaim(allow part time employees to claim pay)
	-provide access to employee data	

Class	Responsibility	Collaborators
Admin	-Load CSV data to array	-EmployeesFullTime.CSV -EmployeesPartTime.CSV
	-Add/Remove Employees	-Employee(gives access to employee data fields)
	-Update CSV with changes	-EmployeesFullTime.CSV -EmployeesPartTime.CSV
	-Provide access to array list of employees	-Employee(gives access to employee data fields)

Class	Responsibility	Collaborators
HumanResources	-Promote Employees	-Admin(give access to employee ArrayList and csv methods) -Employee(give access to employee related methods)
	-Give a raise	-Employee(give access to employee related methods) -Admin(give access to employee ArrayList and csv methods)
	-Update the CSV with changes made	-Admin(give access to employee array and csv methods)

Class	Responsibility	Collaborators
PaySlip	-Generate Payslip on specified date	-Deductions(Provides the calculations and methods for pay)
	-Saves payslip details from csv to ArrayList and vice versa	-Admin(grants access to employee Arraylist) -PaySlip.CSV
	-method to print payslip details for a given employee	-Employee(gives employee details and methods associated with employee) -Deductions(Provides the calculations and methods for pay) -Admin(grants access to employee Arraylist)

Class	Responsibility	Collaborators
PayClaim	-Check is a employee has requested a payclaim before the second Friday of a month	-PaySlip(grants access to generate payslip method) -Employee(Grants access to employee methods and data fields)
	-generates a Payslip if the claim is made on time	-Employee(Grants access to Employee methods and data fields)
	- Prints messages to inform the employee about the status of their pay claim.	-Employee(Grants access to employee methods and data fields)

Class	Responsibility	Collaborators
Deductions	-Do the arithmetic calculations for the deductions(e.g PRSI) to a employees monthly pay and calculate the net pay	-Employee(Allows access to employee data and methods)
	-Load Salary.csv and input the values needed from it into the code such as salary point, position and salary for that position.	-Salary.CSV(has the information for positions,salaries and salary points)
	-Stores and manages an employees position, Salary point and Salary	-Salary.CSV(has the information for positions,salaries and salary points)

Class	Responsibility	Collaborators
CLI	-Initialize and run a Command Line Interface	-Uses all classes but PayClaim to initialize Objects in order to use all the methods created
	-Process commands for Employees, Admins and Human resources users.	-Employee(Allows access to employee data and methods) -Admin(grants access to employee ArrayList) -HumanResources(grants access to Promote or giveRaise methods)
	-Load multiple CSV Files to ensure methods have data to use.	-Admin(grants access to employee list made from CSV) -Payslip(Grants access to LoadPCSV which loads the payslip CSV)
	-Manage List of valid roles for full and part time Employees	
	- Handle user input for interactive command-line use.	
	-Ability to show employee details or payslip details for a specified employee.	-Employee(Allows access to employee data and methods) -Admin(grants access to employee ArrayList) -Payslip(Grants access to the payslip ArrayList)
	-Ability to update the multiple CSV files with new data/removing data.	-Employee(Allows access to employee data and methods) -Admin(grants access to methods that edit the employee array list) -HumanResources(grants access to Promote or giveRaise methods) -Payslip(Grants access to generatePayslip method)

Class	Responsibility	Collaborators
Run	-Run CLI	CLI(grants access to all the code put together to run depending on inputs)
